

# Recycled-Plastic

## ***Out of yoghurt cups!***

The raw material for the play devices is made of the content of the recycling bin.

Yoghurt cups, chip bags & Co. are the source of new ideas. This protects the resources, the cutting down of the forests is counteracted and the plastic waste gets a meaningful use.

## ***The result is a product with a fun factor!***

- round palisades in brown and blue – diameter 10 or 14 cm
- square profiles in brown – 3x10 / 4x10 / 7x7 or 12x12 cm
- covering caps in brown

## protection of the resources

- raw material made of the recycling bin
- relief of landfills
- no cutting down of forests
- harmless for soil and water

## protects human & nature

- no impregnation or coatings
- sanitary harmless
- food-safe (DIN EN 71-3)

## long-living & economical

- low maintenance
- weather-resistant
- minimal risk of vandalism
- colourfast & UV-stable
- easy cleaning
- constant against seawater and salty air

## for our children

- shatterproof
- tear resistance
- massive & solid
- non-slip

**15.400** food packaging à 14g

are used for a play-tower without a roof with a height of 1,47m

### Balustrades & Roofs

... are made of three-layer-plates in different colours and with milled motives

### base plates

... with non-slip square outlines, 20mm thickness
